

# Treatment With HyaRelief™

The product should be administered according to the frequency determined by the physician, according to the recommended frequency decision, such as 6-8-12 months. The number of injections is a decision you and your doctor need to make.

## WHEN SHOULD YOU NOT TAKE HYARELIEF™?

HyaRelief™ should not be injected in patients with known sensitivity to any of the ingredients contained in the product.

HyaRelief™ should not be injected in patients with pre-existing infections of the skin in the region of the intended injection site.

HyaRelief™ should not be administered in cases of known systemic bleeding disorders and known infection of the index joint, infected, and inflamed joints.

HyaRelief™ may contain trace amounts of gram-positive bacterial proteins, so it should not be administered to patients with a history of such allergy.

## What is HyaRelief™?

Each injection delivers highly purified hyaluronic acid to the human joint disorders such as osteoarthritis.

HyaRelief™ is intended for the treatment of symptoms of human joint disorders such as osteoarthritis.

HyaRelief™ is indicated for viscoelastic replenishment or replacement of synovial fluid in human joints.

Reduces joint pain and stiffness for up to 6 months.
