COLLECTION ARCHITECTURE

AuraLift – the dermal filler collection. Alongside its in-house flagship bone cement and its intra-articular gels, sutures and hemostat products, the company’s hyaluronic-acid dermal-filler line is presented here as AuraLift.

Cross-linked HA gels formulated across a spectrum – from the most fluid texture to the densest structuring gel – so the right consistency can be chosen for every area and every depth. Ten models, each in 1 mL and 2 mL.

Precision

6 MODELS

Area-specific – six models from fluid to dense. Each formula is tuned to one facial zone and one depth.

CHOOSING BETWEEN THE SERIES

Precision offers a model per facial zone for practitioners who want to match texture to depth exactly. Essentials condenses the same spectrum into four decisions — lighter stockholding, faster selection.

COMMON TO ALL TEN MODELS

Cross-linked hyaluronic acid gel • supplied in 1 mL and 2 mL • **CE marked, Class III medical device** • manufactured under an ISO 13485 certified quality management system • for authorized medical professionals only.

Which model for which area?

Read the face top to bottom, from the most fluid texture to the densest structuring gel.

RECOMMENDED MODEL BY AREA

AREA	RECOMMENDED MODEL	TEXTURE	FLUID → DENSE
Forehead & fine expression	GLOW / PRIME	Most fluid	
Eye area & barcode lines	SILK	Most fluid	
Lips & contour	SILK / SOFT	Fluid	
Nasolabial & marionette	CONTOUR	Mid-depth	
Cheekbones & temples	VOLUME	Dense	
Jawline & chin	DEFINE / SCULPT	Structuring	
Deep wrinkles	MATRIX / DEEP	Densest	

Precision offers one area-specific model; Essentials condenses the same spectrum into four choices. Where two models are listed, the first is the Precision option and the second its Essentials equivalent.
